PRODUCT DESCRIPTION

We grow chamomile in our own farm. The secret to the exceptional quality of this tea lies in the organically grown Estonian chamomile, the right time of harvest, the right drying temperature and preservation conditions. Organic products are not merely free of pesticides, they are also richer in taste. If you use chamomile for health reasons, choose organic chamomile - your organism needs clean, high-quality, toxin-free food, especially when you are ill. Prefer real, high-quality food!

Strong chamomile taste. Fresh colour.
